

# Probabilistic Quantitative Precipitation Forecasts at the Weather Prediction Center

**Frank Pereira**  
Forecaster  
NOAA Weather Prediction Center (WPC)

**With contributions from WPC staff**

U.S. – Canada Virtual Border Conference  
25-26 September 2013

# WPC QPF Services

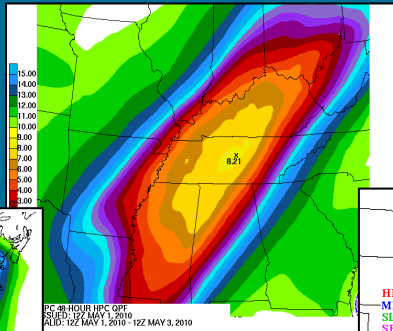

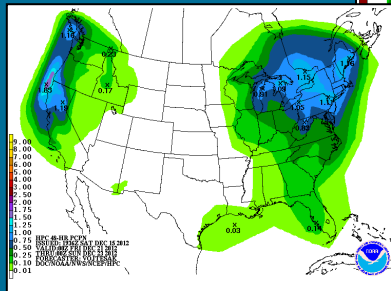

Deterministic

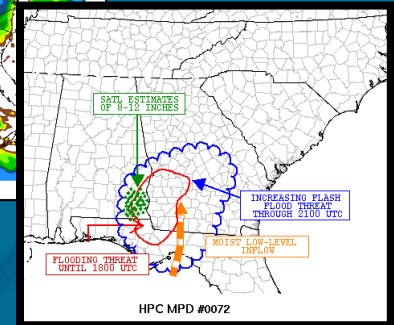

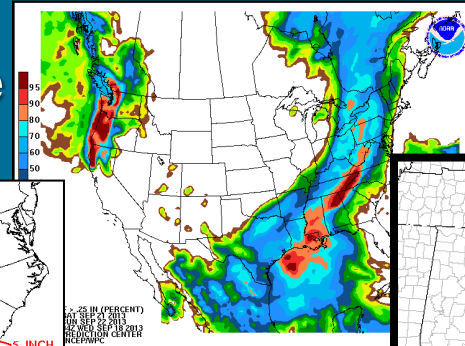

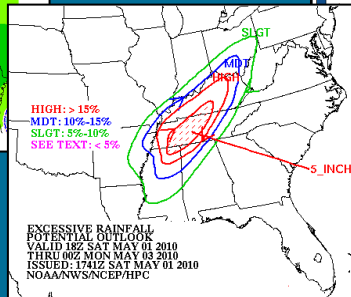

Probabilistic

Mesoscale  
Precipitation  
Discussion

Days 1-7

Excessive  
Rainfall

1 Week

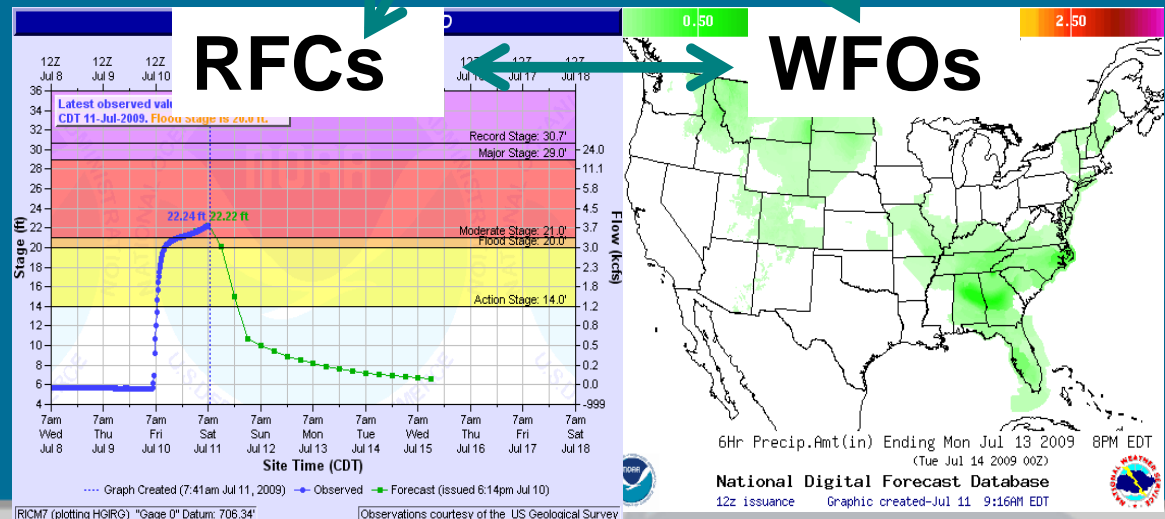

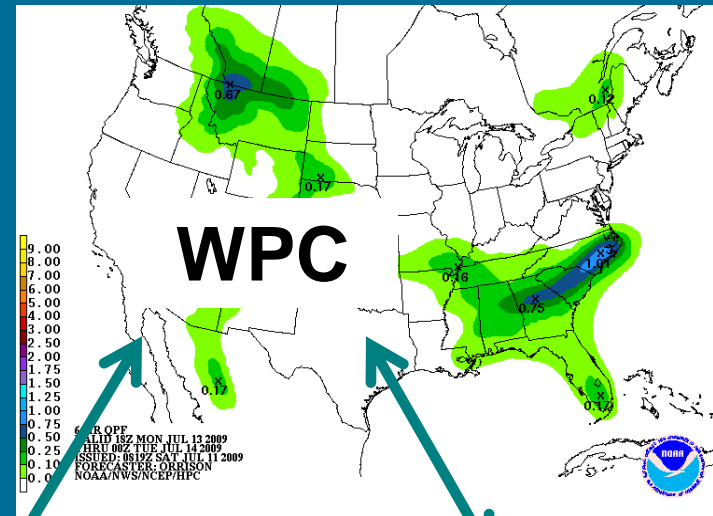

forecast lead time

hours

# Deterministic QPF

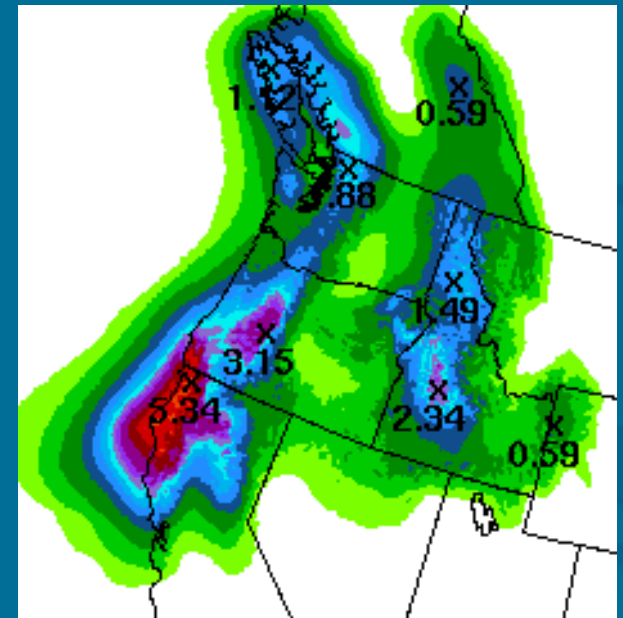

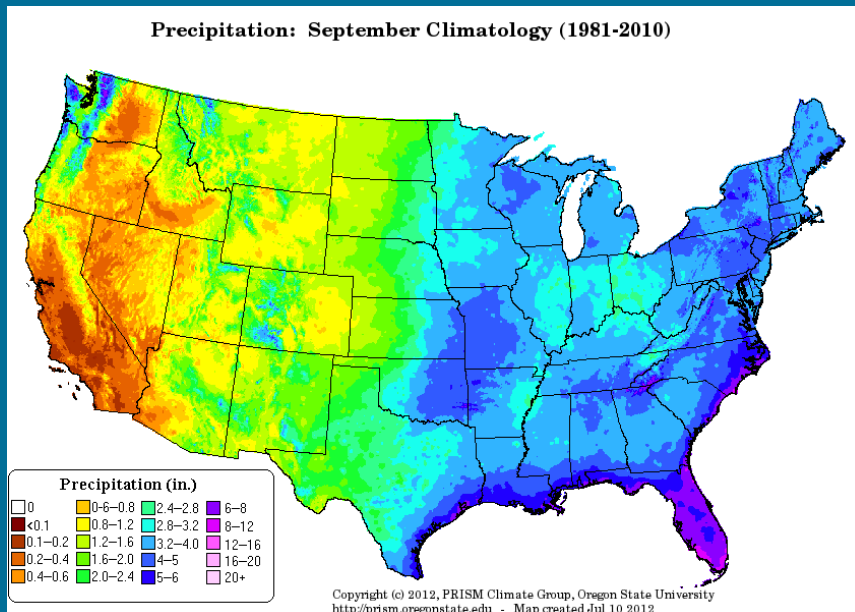

- 6-hourly QPF to projection day seven (120-hrs)
- Graphical, gridded, kml
- QPF Discussion

# Deterministic QPF

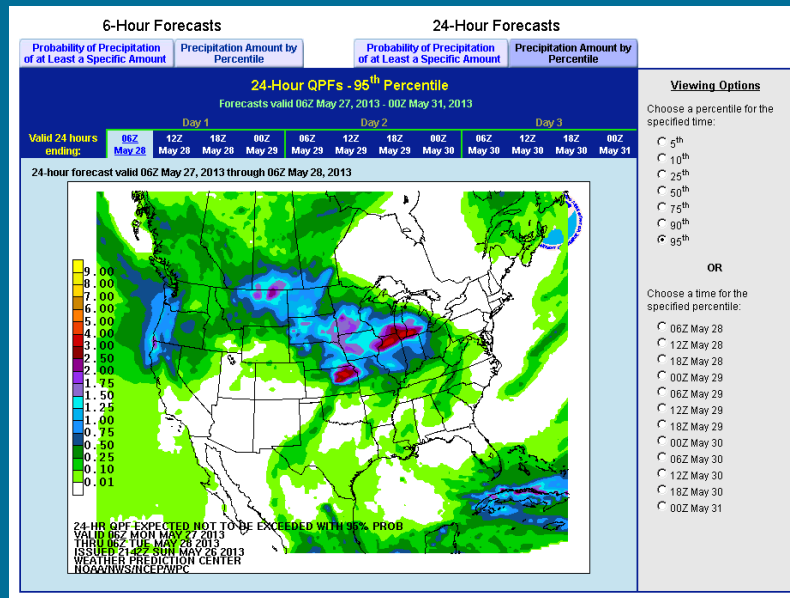

- Forecast of areal average (does not necessarily capture maxima) for projection days one through seven
- Produced at 32-km resolution, but linearly interpolated to 5-km for NDFD
- Starting October 2013, downscaling to 5-km will use PRISM/climatological data which better captures complex terrain

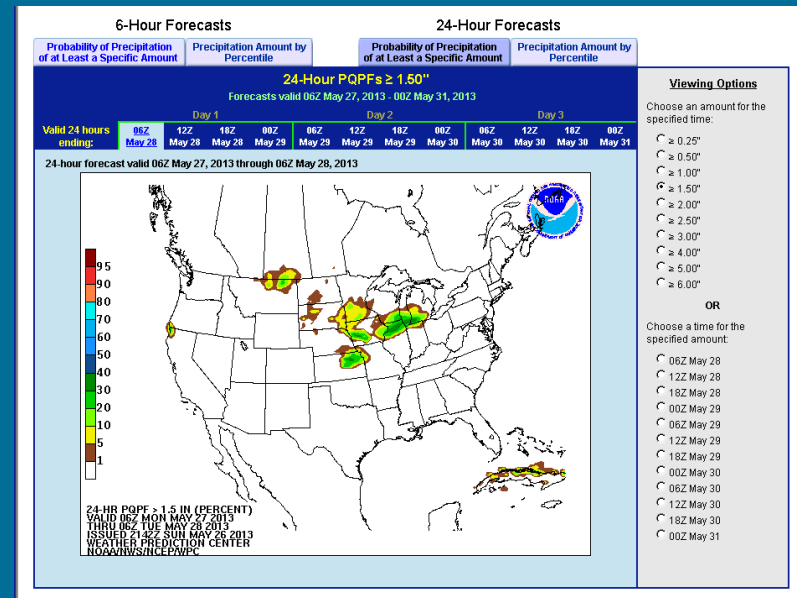

# Probabilistic QPF

## QPF by Percentile

5<sup>th</sup>, 10<sup>th</sup>, 25<sup>th</sup>, 50<sup>th</sup>, 75<sup>th</sup>, 90<sup>th</sup> & 95<sup>th</sup> percentiles

## Probability for QPF Threshold Values

0.25-, 0.50-, 1.0-, 1.5-, 2.0-, 2.5-, 3.0-, 4.0-, 5.0- & 6.0-in thresholds

6- and 24-hr increments for projection days one through three

# WPC PQPF Method

Modifies ensemble distribution such that WPC deterministic QPF is the mode, while allowing skew

# WPC PQPF Method

Modifies ensemble distribution such that WPC deterministic QPF is the mode, while allowing skew

# Colorado-New Mexico

September 11-12, 2013

WPC Deterministic 24-hr QPF  
Valid 12Z 12 September 2013

Forecast 24-hrs

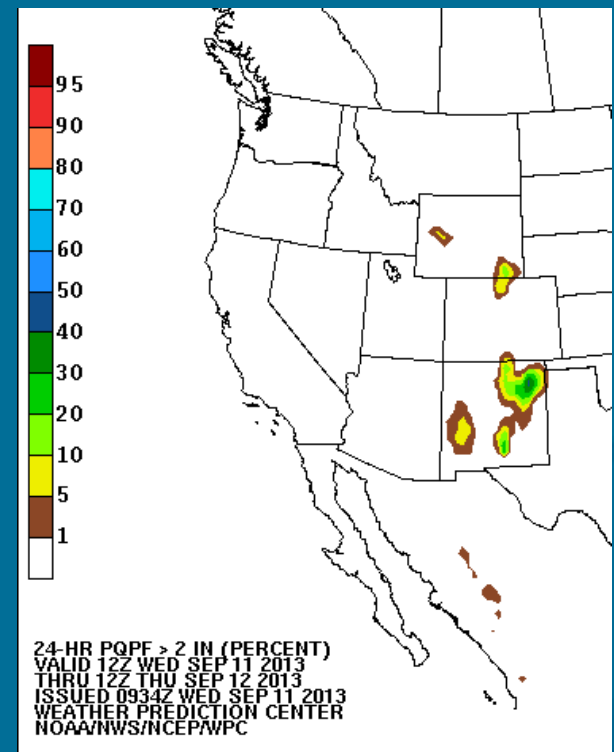

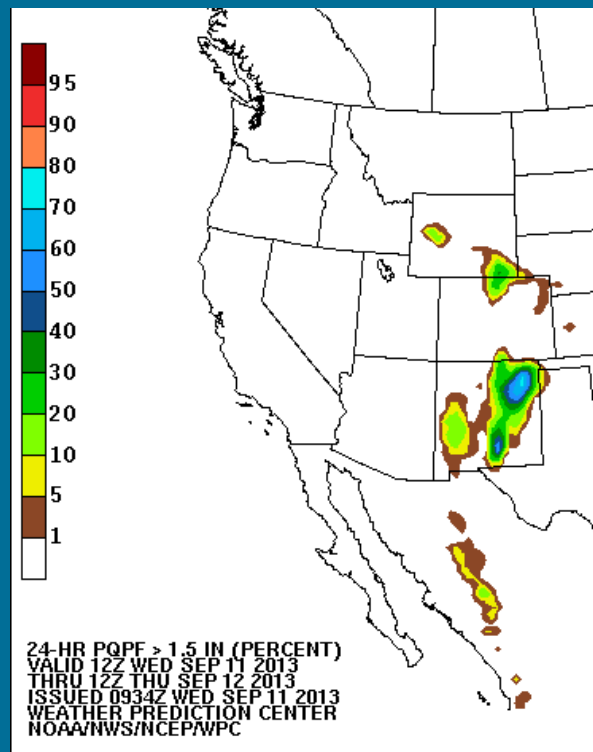

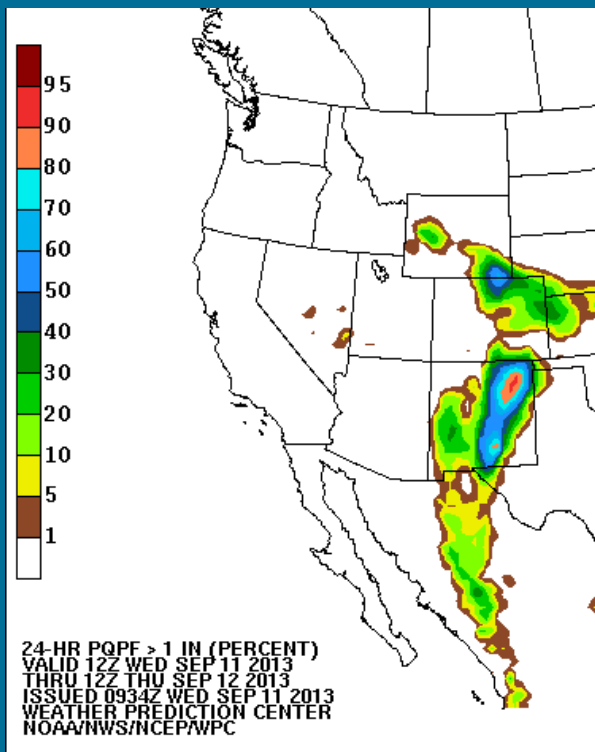

# Colorado-New Mexico

September 11-12, 2013

24-hr PQPF > 1-in

24-hr PQPF > 1.5-in

24-hr PQPF > 2-in

12Z 11 September 2013 forecast 24-hrs

# Colorado-New Mexico

September 11-12, 2013

10<sup>th</sup> percentile

(90% chance of exceeding)

25<sup>th</sup> percentile

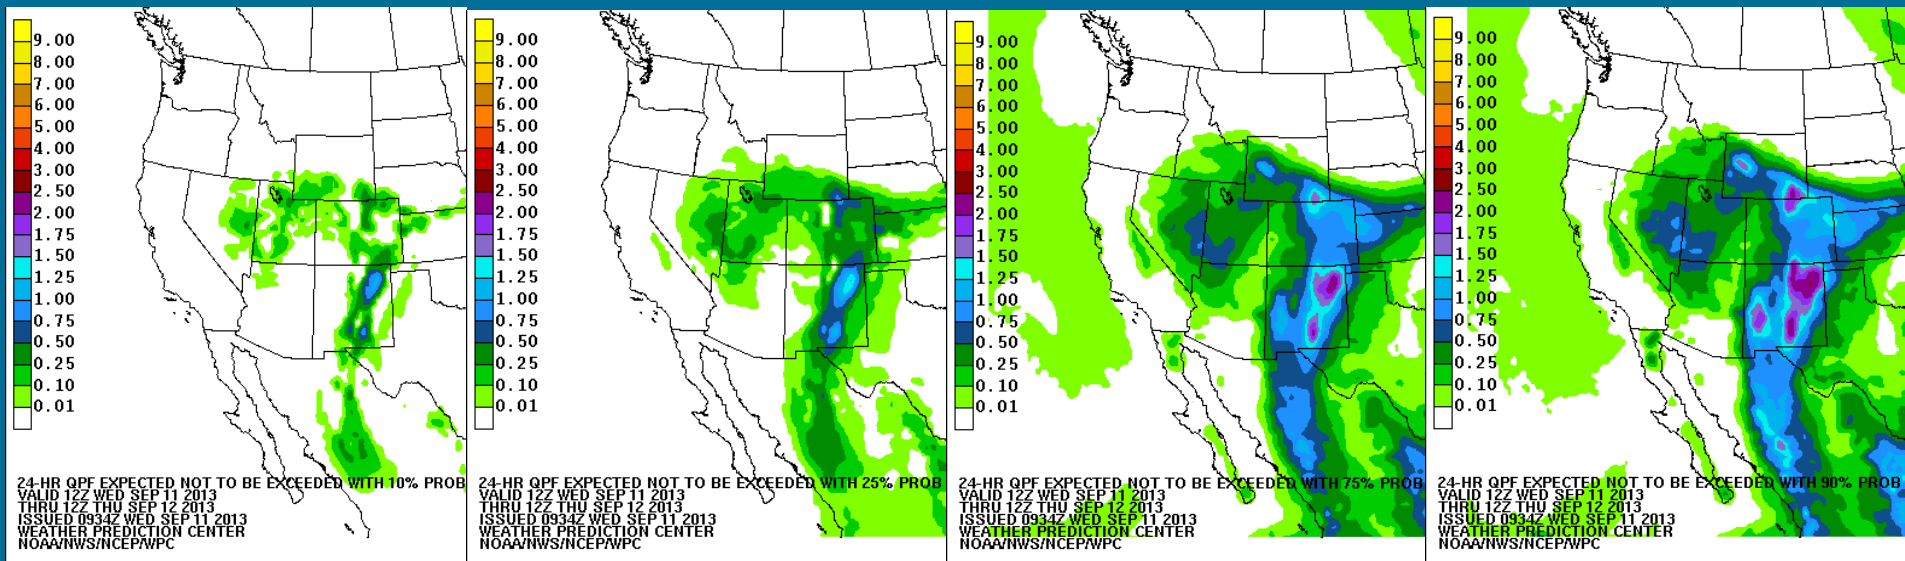

(75% chance of exceeding)

75<sup>th</sup> percentile

(25% chance of exceeding)

95<sup>th</sup> percentile

(5% chance of exceeding)

12Z 11 September 2013 forecast 24-hrs

# Colorado-New Mexico

September 11-12, 2013

NWS Western Region: 9/12/2013 1-Day Observed Precipitation  
Valid at 9/12/2013 1200 UTC- Created 9/14/13 23:31 UTC

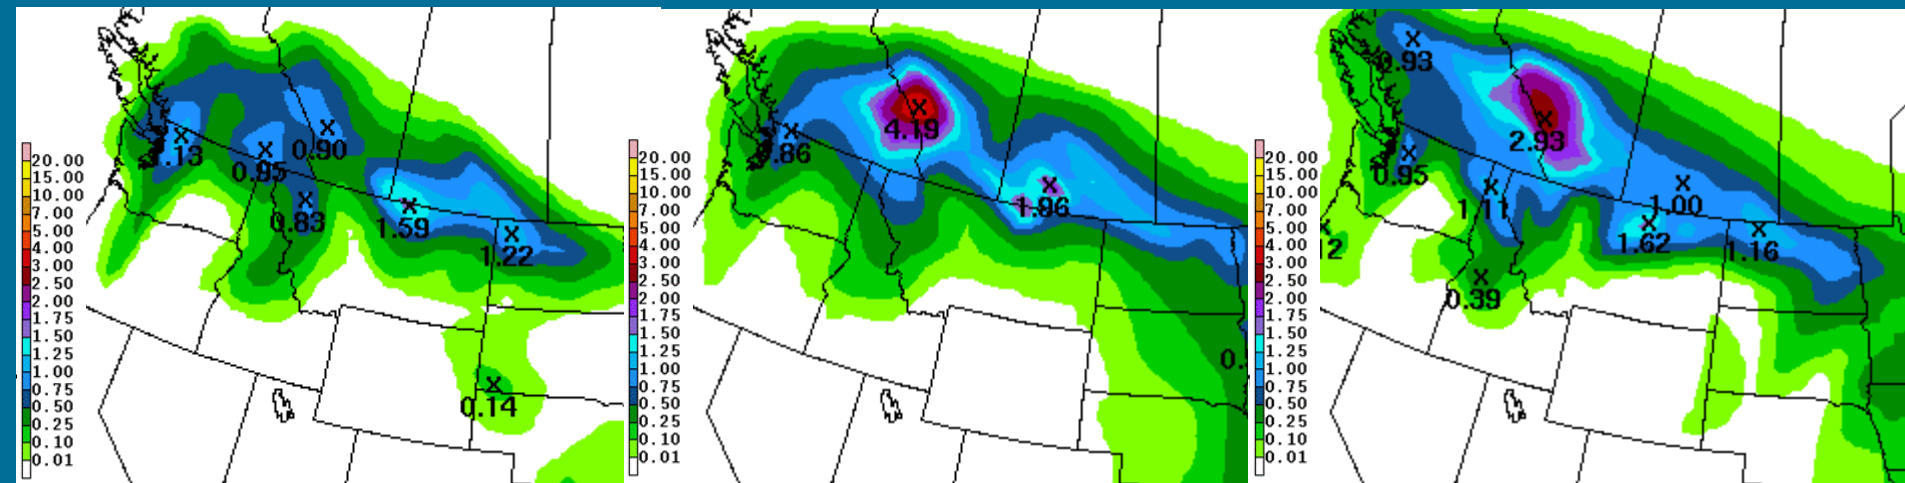

QPE Valid 12Z 12 September 2013

# Southern Alberta

June 20-21, 2013

WPC Deterministic 24-hr QPFs  
Valid 00Z 21 June 2013

Forecast 72-hrs

Forecast 48-hrs

Forecast 24-hrs

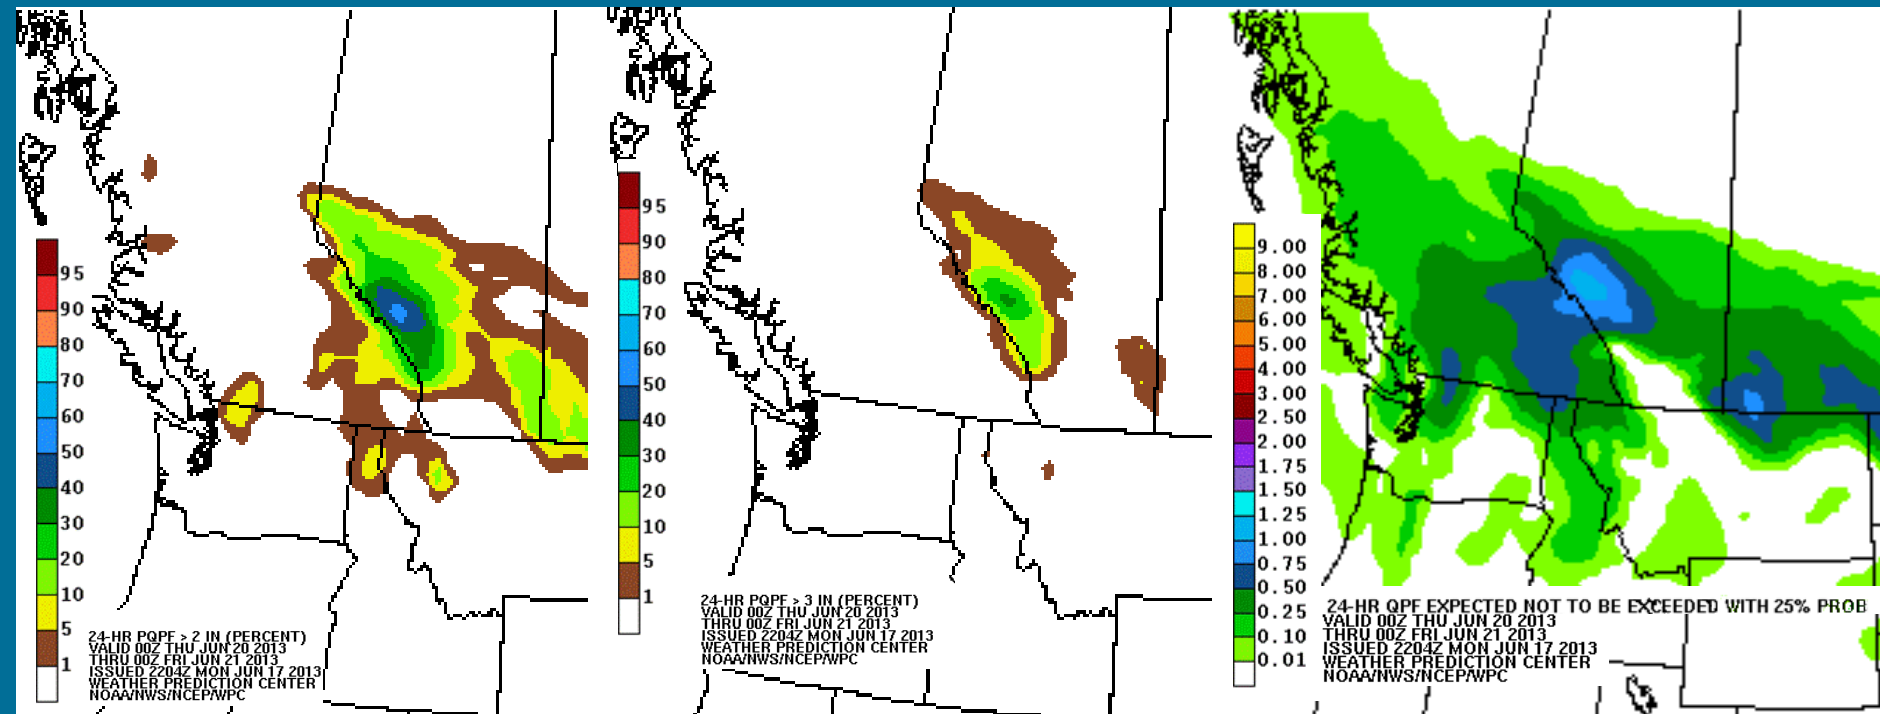

# Southern Alberta

June 20-21, 2013

24-hr PQPF > 2-in

24-hr PQPF > 3-in

24-hr 25<sup>th</sup> percentile  
(75% chance of exceeding)

00Z 18 June 2013 forecast 72-hrs

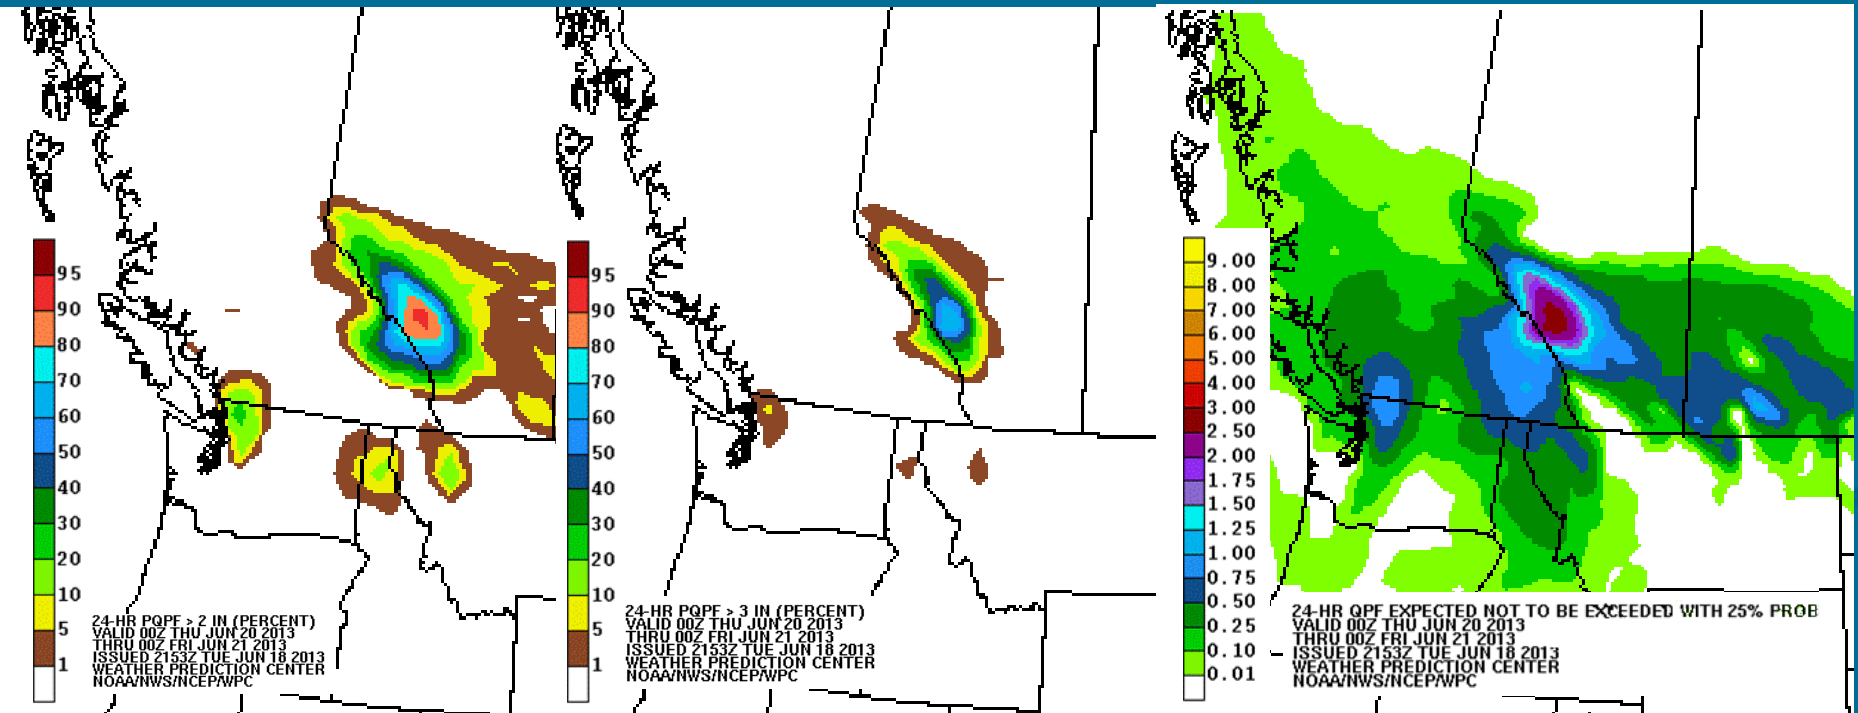

# Southern Alberta

June 20-21, 2013

24-hr PQPF > 2-in

24-hr PQPF > 3-in

24-hr 25<sup>th</sup> percentile  
(75% chance of exceeding)

00Z 19 June 2013 forecast 48-hrs

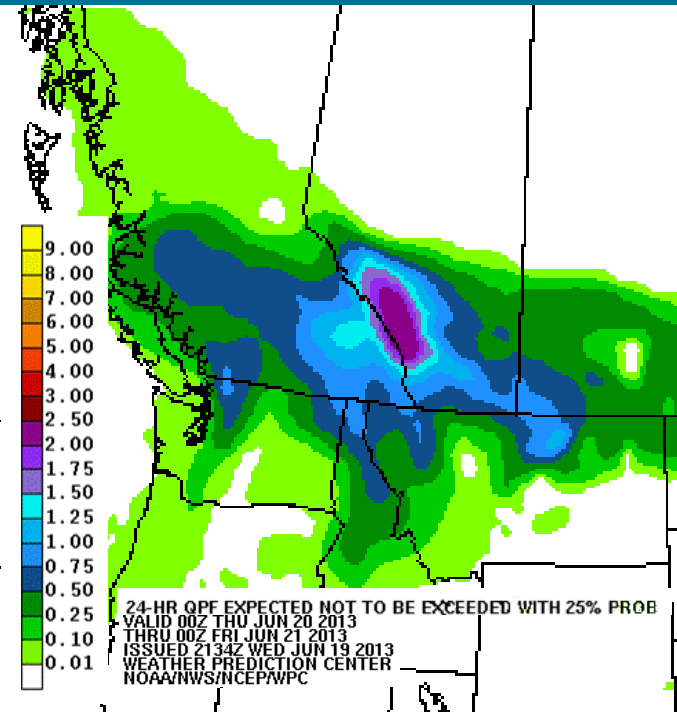

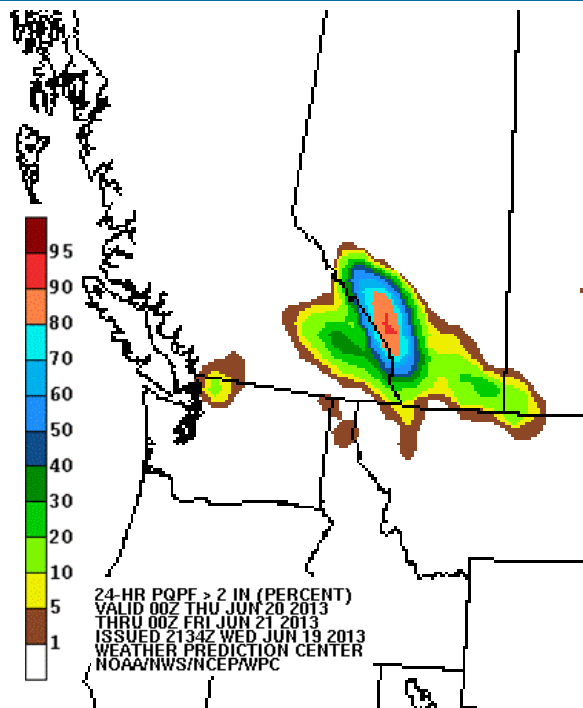

# Southern Alberta

June 20-21, 2013

24-hr PQPF > 2-in

24-hr PQPF > 3-in

24-hr 25<sup>th</sup> percentile  
(75% chance of exceeding)

00Z 20 June 2013 forecast 24-hrs

# Summary

- WPC deterministic QPF for forecast projection days one through seven available at –  
<http://www.wpc.ncep.noaa.gov/qpf/qpf2.shtml>
- WPC PQPF for forecast projection days one through three available at –  
[http://www.wpc.ncep.noaa.gov/pqpf/conus\\_hpc\\_pqpf.php](http://www.wpc.ncep.noaa.gov/pqpf/conus_hpc_pqpf.php)
